

MAYU BEATZ

QUICK START GUIDE

Levitation Vocal Presets (FL Studio)

You just grabbed 3 Levitation vocal presets — pro vocal chains built entirely from FL Studio's stock plugins. Drop one on a vocal and you're most of the way to a finished sound. No third-party plugins needed.

INSTALL IN 60 SECONDS

- 1 Unzip the folder.
- 2 Move the presets into your FL mixer-preset folder: **Documents** → **Image-Line** → **FL Studio** → **Presets** → **Mixer states** (make a "Levitation" subfolder if you like).
- 3 In FL, open the **Mixer** (F9) and select your vocal's track. Find the preset in the Browser under **Mixer presets** and **drag it onto the track** — or use the mixer menu ▶ **File** ▶ **Open mixer track state**.

Full walkthrough in the install video.

DIAL IT IN FIRST

A minute of setup and each preset sits right on your vocal — do this **before** you hit play.

- ◆ **Level it in first.** Get your vocal hitting the mixer track at a healthy level before the chain — it reacts to how hard you feed it.
- ◆ **Set the key in Pitcher.** Open the **Pitcher** plugin on the chain and set your song's key / scale so it tunes to the right notes.
- ◆ **Dial the auto-tune to taste.** Tighten Pitcher for a hard, obvious auto-tune; loosen it for a natural, subtle feel.

- ◆ **Make it yours.** Every plugin on the track is fully adjustable — nudge the EQ, reverb, or delay to fit your vocal.

THIS IS JUST A TASTE

You tried **3 of 130+** vocal presets. The full **Infinity Suite** is the complete Levitation library — leads, doubles, ad-libs, and bus effects — plus **vocal recording templates**, VIP patches, mixing chains, mastering chains, synth presets, and **7,000+ custom assets** in total. All from your stock plugins. One time, yours forever.
